For the Scholarship to new annualy, students must main minimum of 24 credits of courses offered From 3 years.

34 FR 518 program

## Certificate of Bilingualism

 A valuable asset for your job search and career progression!aurentian offers you the unique opportunity to complement your degre with a Certificate of Bilingualism which highlights your language competencies and demonstrates that you are officially bilingual. To do so, you need to ensure that you acquire a minimum of 15 credits courses offered in English or French whichever is not your language of study during your program at Laurentian.

## ■■■

## Anishinaabe Culture

Celebrating Anishinaabe culture and the sharing of traditions and knowledge are part of everyday life on campus.

## Experience. Learn. Share.

As a Laurentian student, participation is easy and one of the best ways to create a wide network of friends.
Some of the favourite ISA events and activities include: Biidaabin, Orange Shirt Day Indigenous Student Celebration, Métis Cultural Day, Nakiiwin Tek, Red Dress Campaign, Moose Hide Campaign, Ceremony, cultural teachings, and workshops, academic workshops and mental health awareness.
Ongoing engagement opportunities include traditional ceremonies, language learning, storytelling, cultural workshops, lecture series, tudent project fairs, which are hosted by ndigenous Students Circle.

Our campus is greatly enriched by an active and engaged Indigenous community and the shared earning approach of the Indigenous Student Affairs Office.

## ■■■ <br> Experiential Learning

Choose meaningful learning opportunities beyond the classroom.

At Laurentian, we recognize that experience is essential to the success of our graduates entering the workforce. Experiential learning opportunities for our students are available in the form of enhanced leadership development, entrepreneurship and applied learning in varied settings to enhance their skill sets.

The Foundry - The Foundry is an innovation, entrepreneurship and leadership development program ocated within the spacious Jim Fielding Innovation and Commercialization Space at Laurentian. The Centre aims to commercialization Space at Laurentian. The Centre aims to they strive to develop innovative, creative, and professional skill sets and launch entrepreneurial ventures on campus. In addition to open collaborative spaces and dedicated meeting rooms, users also have access to a Makerspace facility with 3D printers, SOLIDWORKS® as well as other design software, a CNC Mill and laser cutter for training nd product development purposes. Stop by the Fielding nnovation Space or check out our calendar of events at aurentian.ca/fielding-innovation-centre\#calendar
Co-op Experience - This extensive work-integrated o-op Experience - This extensive work-integrated ear of paid emplont to complement their gademic tudies Programs offering co-ops include: Architecture Computer Science, Engineering (Chemical, Mining and Mechanical streams), Sciences (Specializations in Chemistry Biochemistry, Pharmaceutical Chemistry and Biochimie).
nternships - Internships pair students with employer to complete placements that vary in length depending on the program. The format provides students with a chance work in a professional environment and gain valuable xperience while often leading to full-time employment opportunities following graduation

How does experiential learning enhance your in-class education?

- Gain professional work experience prior to graduation, resulting in enhanced career clarity and employability
- Earn academic credit, and in some cases, wages while applying what you've learned.

Strengthen interpersonal skills, self-confidence, and leadership abilities.

- Forge new relationships and create a network of professional and personal contacts
- Connect and engage with prospective employers.

Discover additional opportunities for experiential learning at Laurentian including Work Study employment on associations, and more!

Placements and Practicums - Practicums and placements provide unpaid work experience under the supervision of an experienced registered or licensed professional in programs that require practice-based work experience for professional licensure or certification.
Research - Laurentian offers many of its undergraduate students opportunities for research, thanks to small clas sizes and outstanding professor to student ratio. Having a chance to learn with leading experts in the field in the early stages of your postsecondary journey is one of the unique and powerful advantages of studying at Laurentian.

- Applied research
- Field placements
- Professional practicums
- Case studies
- Co-op experience
- Consulting projects

Consuting projects

## Customize Your Degree

Loving what you do is how you will live your life to the fullest.

Building and customizing your degree to include unique and/or complementary subject combinations can give you an advantage in the workforce.

We make it easy for you to pair subjects you are passionate about while setting you off on a path to a rewarding and fulfiling career. Embarking on a journey that combines your aptitudes and interests is the best way to ensure you are passionate about your future career. Loving what you do is how you will live your life to the fullest. This path starts at the undergraduate level and can lead to graduate studies or professional schools.

CLINICAL SOCIAL WORKER Specialization: Social Work or Indigenous Social Work Minor: Psychology
Graduate Studies: Master's in Social Work (optional)

HEALTH ADMINISTRATOR Specialization: Nursing Graduate Studies: Master's in Health Administration

CONSERVATIONIST CONSERVATION OFFICER Specialization: Earth Sciences Minor: Environmental Chemistry

DOCTOR
Specialization: Health Promotion Minor: Biology
Professional School: Medical School

CRIME SCENE INVESTIGATOR Specialization: Forensic Science Minor: Criminology

PSYCHOMETRIST Specialization: Psychology Certificate: Social Research Methods

Each program has a certain number of required specialized courses that must be taken in order to successfully complete the program of study. Electives are courses that allow you to explore other areas of interest that can expand your career options. You can group electives into one field of study to enhance and/or complement your degree, thus creating minors, concentrations, and majors.

Sample degree combinations* in BA and B.Sc. programs:

| 4 years |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 Specialization (60 cr.) | + | --- | + | 60 elective credits | $=$ | 120 credits / 4-year |
| 1 Major (42 cr.) | + | 1 Minor (24 cr.) | + | 54 elective credits | = | 120 credits / 4-year |
| 1 Major (42 cr.) | + | 1 Major (42 cr.) | + | 36 elective credits | = | 120 credits / 4-year |
| 3 years |  |  |  |  |  |  |
| 1 Concentration (36 cr.) | + | --- | + | 54 elective credits | $=$ | 90 credits / 3-year |
| 1 Minor (24 cr.) | + | 1 Minor (24 cr.) | + | 42 elective credits | $=$ | 90 credits / 3-year |

## $\square \square \square \square$ <br> Money Matters

Tuition at Laurentian is among the lowest in the province!

Tuition and compulsory incidental fees - Ontario residents*
Undergraduate Full-Time Studies - First Year (18 or more credits between September and April)

|  | STUDENT ASSOCIATION | TUITION |  | ANCILLARY FEES |  | TOTAL |

Laurentian's Outdoor Adventure Leadership program was an ideal fit for me. I was taken by the campus' natural landscape of forests, lakes and trails, which is an ideal setting for the program. Structured to blend education in kinesiology and physiology with leadership skills and outdoor adventure training, the program places a strong emphasis on teamwork and my classmates have become a family. I found a sense of belonging at Laurentian.

I chose Laurentian' Forensic Science program for many reasons.
The program is very hands-on
 and the small class sizes allowed me to develop friendships and a sense of community to develop friendships and a sense of community
with my peers. Throughout my four years, we were able to offer each other support and work as a team ■■■
SAM LEAVERS
$4^{\text {n }}$ year, Forensic Science, B. Sc

+11\%
$=$ Did you know?

Lab time dedicated to undergraduate study at Laurentian is significant and one of the most advantageous features for students as they head into the workforce.

## WHAT YOU CAN ANTICIPATE:

- Extensive hands-on labs, starting in $1^{\text {st }}$ year
- Multidisciplinary, interdisciplinary, transdisciplinary
- Moderately sized classes allow for faculty/student engagement and individualized support
Accreditation standing where applicable
- Co-op opportunities in many programs
- Access to research-grade equipment
- Field work experiences
- Connectivity with community partners
- Research experience at the undergraduate level

Opportunities to interact with graduate-level students
Access to leading research centres (Vale Living with Lakes Centre, Perdue Analytical Centre, The Foundry - ideation and innovation spaces) and many more
Dedicated laboratories (science and engineering), workshops (engineering and architecture) and studio spaces (architecture)
Relevant summer work opportunities

- Faculty-level student clubs and amenities

Numerous graduate study opportunities

LaurentianUniversity

## McEWEN $\begin{gathered}\text { School of Architectur } \\ \text { École d'architecture }\end{gathered}$

Canada's newest architecture school in over 45 years, the McEwen School of Architecture is located at the crossroads of award-winning building and campus provides an unfolding experiment in emerging pedagogies and diverse cultures. Its unique architecture program highlights design and culture for orthern Ontario with an emphasis in developing expertise in wood construction technologies.
For additional information about the McEwen School o Architecture, please visit mcewenarchitecture.ca.

## ARCHITECTURAL STUDIES, BAS

Accredited by the CACB-CCCA
Begin the process of lifelong learning in a tricultural program that is unique in Canada and build a portfolio of exciting that is unique in Canada and build a porttolio of exciting
and innovative design-build projects. Experience a distinctive architecture program, which highlights design and culture for Northern Ontario with an emphasis on developing expertise in the use of wood and other sustainable materials. Focus on design, culture, technology, and professional practice. Challeng your creativity through the application of practical building sensitivities,

## Key features

- This program is fully accredited by the Canadian Architectural Certification Board (CACB-CCCA).
Design-Build and Community-Design projects expose students to real community issues and hands-on building experience. Design-Build projects include the design and construction of structures such as ice stations, canoes, saunas, and other northern artifacts.
- At Laurentian, students develop an appreciation for the integration of Indigenous and natural materials in building
and site design, as well as cultivate an understanding of the importance of collaboration and interaction with othe students, faculty, and community groups.
- Strongly rooted in an innovative 28 -week co-op education model, the first work-term in the architecture program takes place in industry and related fields, while the second work term takes place in an office for architecture or a related design field.
such as Germany International travel opportunities to countries such as Germany and Norway to study wood construction and
- Learn to work with northern communities and help shape your own community upon graduation
Unique learning experiences.
- Extensive practical applications through Design Studio.
- Ongoing Design-Build and Community-Design projects. French. (two 14-week placements) paid co-op internship experience.
- Inclusion of diverse cultural backgrounds, including FrancoOntarian, First Nation, Métis, and Inuit course content.
- Access to Elders and/or Knowledge Carriers in Residence
- Unique tricultural architecture curriculum where you wil
experience the spectacular Northern Ontario landscape. A $\$ 30 \mathrm{M}$ facility comprising four buildings forming a courtyard that offers unique teaching opp
performance and sustainability.
- Design-Build projects will include structures such as ice stations and birch bark canoes in first and second year.

## Sample career outcomes

- Architect
- Urban planning
- Community development
- Ecology and sustainability

Language: English (some courses also offered in French)

## Degree options

- Bachelor of Architectural Studies (4-year)

Supplementary program requirements

- Portfolio (portfolio webinar and portfolio guidelines at laurentian.ca/architecture must demonstrate creative work, either in digital or hard-copy format
- One- to two-page statement of interest (students will elaborate on their interest in architecture as well as their choice of Laurentian University).
2 references (names and contact information only; where possible, at least one should be a current teacher)
Note: Admission selection is based upon overall submissio criteria and not solely on grade averages.

## BEHAVIOURAL NEUROSCIENCE, B.Sc.

Study the relationships that exist between behaviour and the structural, chemical, and electromagnetic organization of the brain. Study a key discipline that strives to relate all aspects of behaviour, experiences, and feelings to changes in the chemistry, cell activity, and physics of the brain. Understand why abnormal changes in the physical properties of the brain are responsible some changes can produce special behaviours, such as unique talents. Enjoy a program that is designed to meet the growing demand for scientists and technicians with a broad knowledge of both behavioural and biochemical sciences
Key features

- Opportunity for third-year students who display exceptional dedication and skill to work in research laboratories on cutting edge neuroscience projects.
- Research publication opportunities at the undergraduate level
- All students must complete a fourth-year thesis.
behaviour to the complex molecular biology of the iunction between nerves and muscles.
- Program prepares students interested in stud
behaviour with neurobiological perspectives.
- Program is designed to meet the growing demand for scientists and technicians with a broad knowledge of both behavioural and biochemical sciences.
admission requirements is program correspond with psychology graduate programs.

## Sample career outcomes

- Gesearch in Neuroscience, Biology or Psychology

Education schools (medicine, dentistry, etc.)
Language: English (some courses also offered in French)

## Degree options

Bachelor of Science in Behavioural Neuroscience (4-year)

- Specialization in Behavioural Neuroscience

## BIOCHEMISTRY, B.Sc.

## (BIOCHIMIE, B.Sc.)

-year program accredited by the Canadian Society for Chemistry (CSC)
Make a difference in the fields of medical research, genetic engineering, biotechnology, forensics, and many others with a degree in biochemistry. Do you see yourself working as a scientist in a role that makes a real difference? With biochemistry, you solve crimes through DNA analysis, improve agriculture, develop new and improved diagnostic tests and much more. Study the structure and properties of molecules at the core of life itself. Learn the fundamentals of biochemical principles and practical techniques that you can apply in a wide range of industries, and cross many different professions.

## Key features

-The 4-year program is accredited by the Canadian Society for Chemistry (CSC).

- Become involved in research projects with professors and
scientists on campus, at the Health Sciences North Research
- Lab sessions in newly renovated spaces provide a hands-o
approach to instrumentation.
- Small classes provide unique opportunities (e.g. paid teaching assistantships, one-on-one instruction during labs, use of
research-grade equipment).
- Participate in the co-op program to gain paid work experience in your field during your studies.
Sample career outcomes
- Research and developme
- Professional school (d

Professional school (dentistry, medicine, optometry, veterinary
medicine, pharmacy, etc.)
Language: English/French

## Degree options

Bachelor of Science in Biochemistry (4-year)

- Specialization in Biochemistry

M in in Biochemistry

## BIOLOGY, B.Sc.

(BIOLOGIE, B.Sc.)
With a wide range of options, you can direct your ideal caree path and choose to study any living thing from humans to viruses. Biology is the science of life. This includes all organisms from the microscopic to whole communities of plants and animals. Take advantage of your ability to create the career path of your dreams. Work to solve important issues in your area of interest, such as disease management and research, natural resource management and conservation, public health, anima environment and organisms.

## Key features

Foundational studies allow you to tailor your degree as you go.

- Diverse degree specializations lead to multiple career choices and opportunities
- Over 700 hours of hands-on labs and field trips allow you a deeper engagement with the subject matter
Apply your knowledge of the world around you to solve modern issues in the environment, public health, and disease management.

## Sample career outcomes

- Environmental consulting companies
- Federal and provincial ministries
- Graduate studies, mining companies

Professional senool (chiropractic, dentistry, physiotherapy
Language: English/French

## Degree options

- Bachelor of Science in Biology (4-year)
- Specialization in Biomedical Biology
- Specialization in Z
- Bachelor of Science in Biology (3-year)
- Concentration in Biology
- Minor in Biology

## BIOMEDICAL BIOLOGY, B.Sc.

(BIOLOGIE BIOMÉDICALE, B.Sc.)
This program provides a strong background in areas relevant to medicine within the field of biology. Students can pursue combined degrees in other disciplines such as psychology, physiology cell biology biochemistry microbiology genetics, histology, and development biology. In adddition, students can choose elective courses from the Social Sciences or Humanities, and from other disciplines.

## Key features

- Gain over 700 hours of practical, hands-on laboratory
experience.
- Starting in the first year, students are provided opportunities to engage in hands-on learning in labs.
- Students may also engage in research activities under the supervision of professors from Laurentian University, the North
- The specialization in Biomedical Biology provides students with a wide variety of career paths and students who are highly motivated for careers in the biomedical field will do very well in this program.

Sample career outcome
Professional schools (chiropractic, dentistry, physiotherapy, human and veterinary medicine)
Education

- Laboratory technician

Language: English/French

## Degree options

Bachelor of Science in Biomedical Biology (4-year)

- Specialization in Biomedical Biology

## CHEMISTRY, B.Sc.

4 -year program accredited by the Canadian Society for Chemistry (CSC)
Become a leader in several challenging and in demand careers or today's technology-oriented society. Choose a focus in materials chemistry, or pharmaceutical chemistry Enjoy the many benefits of small class sizes, such as greater interaction with professors, more lab time, personal tutorial sessions, and great group dynamic. Work on research projects with your professors and scientists on campus, in the local mining industry, the Health Sciences North Research Institute, and the Northern chool of Medicine.

## ey features

Take control of your career by specializing in areas that you are
passionate about.
Choose from many chemistry disciplines such as computationa chemistry, electrochemistry, metal pollutants, nanotechnology surface chemistry, and natural products chemistry

- Get a hands-on approach to instrumentation in our nationally
accredited program.
Small classes provide unique opportunities (e.g. paid teaching assistantships, one-on-one instruction during labs, use of
- Participate in the co-op pro

Par your field during your studies to gain paid work experience nour field during your stud
Sample career outcomes

- Research and development (academic, industrial)
- Industrial quality assurance and quality control (steel, plastic, petrochemical, mining, food industries, etc.)
Professional school (pharmacist, physician, dentist, veterinarian, etc.
Language: English
Degree options
Bachelor of Science in Chemistry (4-year)
- Specialization in Chemistry
- Major in Chemistry
- Bachelor of Science in Chemistry (3-year)

Concentration in Chemistry

- Minor in Chemistry

## COMPUTER SCIENCE, B.Cosc.

Apply your knowledge to solve complex problems through computer-based applications. Study a wide range of subjects from computing theory and math to cutting-edge developments in robotics, computer vision, intelligent systems, bioinformatics, and other exciting areas. Learn the fundamentals of compute science such as high-level programming languages, discrete system, database programming, programming in $\mathrm{C}++$, and assembly language. Further focus on your area of interest such as computer organization, software engineering, programming languages, operating systems, etc.

## Key features

- Take control of your career by specializing in areas that you are passionate about.
- Choose from many areas of computing such as theory programming languages, computer organization, operating
systems, digital design, systems analysis, computer networks, systems, aligitai design, systems analysis, computer networks, computer graphics, software engineering, video game design, and human computer interaction
- Three-year programs lead to a Bachelor of Arts or Science in Computer Science, alone or combined with math or another subject.
- Participate in the co-op program to gain paid work experience in your field during your studies.

## Sample career outcome

- Systems analyst
- Database design and implementation
- Video game design

## Language: English

## Degree options

Bachelor of Computer Science (4-year)
Specialization in Computer Science (B.Cosc.)
Mathematics (B.Cosc))
Major in Computer Scie

- Major in Game Design
- BA-3 year or B.SC.-3 year with Concentration in Computer Science
Minor in Computer
- Minor in Game

## 

The Harquail School of Earth Sciences is located at the edge of North America's oldest, largest, and best-preserved meteoritic mpact structure. This exceptional location provides access to various geological settings, right on campus, and aligns with our radition of practical training in field and laboratory techniques. tudents at our School also benefit from Sudbury's rich geoscience community, which is linked to the entire mining cycle,
rom exploration to restoration. This is arguably the best place in the world to study geology!
Please visit hes.laurentian.ca to connect with us and to earn more about our programs, faculty expertise, student experiences, active research, and recent events.

## EARTH SCIENCES, B.Sc

Explore how much of Earth's 4.5 billion years of history can be deciphered using tools from all scientific disciplines. Understand and appreciate complex processes at various scales, from atomic interactions that create beautiful minerals to the enormous forces that cause volcanoes and earthquakes. Apply your skills to advance our knowledge of the "pale blue dot "we call Eat
Build a better world by helping find the resources needed to tackle big problems like climate change with new technologies, takle big problems like climate change with new techno sustainable ways.

## Key features

Enjoy optimal class sizes and an open learning environment where you can learn about geological processes using ancient and recent rocks and fossils from all over the world
high-tech microscopes and other specialized equipment in
laboratory exercises and field schools.

- Join an active community of students, staff, and faculty involved in organizing events, trips, and outreach activities related to Earth sciences.
Gain valuable work experience in the summer with various organizations in the mining industry, government agencies,
and research centres, thanks to our location in one of the on in one of the
Collaborate in cutting-edge research projects led by our facult and supported by grant agencies and industry partnerships.
- Complete your 4 -year degree in Earth Sciences and immediately meet the knowledge requirements to become a professional geoscientist (P.Geo.) with Professiona Geoscientists Ontario (PGO)

Sample career outcomes

- Mine geologist
- Geoscience consulting
- Environmental scientist
- Excellent foundation for graduate studi

## Language: English

Home to the Chemical, Mechanical and Mining Engineering programs and located in the state-of-the-art Cliff Fielding Building, the award-winning Bharti School of Engineering als
offers graduate programs with a focus on mining miningoffers graduate programs with a focus on mining, miningengineering, as well as bioprocesses and extractive metallurgy. For additional information about the Bharti School of Engineering, please visit www3.laurentian.ca/engineering

## CHEMICAL ENGINEERING, B.Eng.

Accredited by the Canadian Engineering Accreditation Board (CEAB)

Become part of a worldwide organization of professionals who are at the forefront of addressing the needs of society and the world's economy, and ensuring it is accomplished in a sustainable manner. Learn about chemical processes, bioprocesses, and economy and benefit society You can also choose to focus your degree with specialized options in sustainability and the environment, or extractive metallurgy and mineral processing. Combine what you learn and your creativity to solve issues and innovate sustainable products and processes. Through group design projects, tackle issues like renewable energy, environmental protection, mineral extraction and processing,
green production, and many more regionally and globally green production, and many more regionally and globally training through working in the industry during the 16 -month co-op program, which you can start in your second year.

## Key feature

Learn the skills to be able to contribute to solving regional and global issues, such as developing sustainable processes.
co-op program provides professional experience and exposure, while earning money. It also enhances your resume Wy earn ing knowledge and skills valuable to future employers. Work in groups to apply your creative problem solving skills, world.

Sample career outcome
Sustainability and environmental control
Oil, gas and mineral processing/Bioenergy

- Process engineering

Language: English
Degree options
Bachelor of Engineering in Chemical Engineering
(CEAB Accredited) ( 144 credits)

- Option in Environmental Sustainability

Option in Extractive Metallurgy

## MECHANICAL ENGINEERING, B.Eng

Accredited by the Canadian Engineering Accreditation
Board (CEAB)
From robots to high-speed trains, work collectively toward the etterment of society by designing new machines, devices,
and processes. Apply your problem-solving skills to diverse
areas such as robotics and automation, heating and ventilation,
biomechanics, transportation, energy production and conversion,
and many more. Learn about dynamic modelling, control
and mechanical design, microprocessor programming fluid
mechanics and heat transfer. Finally if you wish, you may choos
o specialize in the area of mechatronics.
Key features

- Benefit from access to a fully equipped machine shop allowing you to integrate hands-on work into your studies and increas your employability.
Gain valuable engineering work experience through paid
internships by participating in the co-op education program.
- Join student-driven teams working on the design, analysis
lanetary exploration rovers for participation in internation competitions.
Sample career outcomes
Mechanical desian mes
- Research and development engineer

Control and instrumentation engineer
Quality control engineer/Preventative maintenance enginee

## anguage: English

Degree options
B.Eng. in Mechanical Engineering - General Option (CEAB Accredited) (144 credits)
Option in Mechatronics

## o-operative Education

he optional co-operative (Co-op) component is a plan of work integrated learning where students, starting in the second ear, put their academic knowledge into action through paid discipline-related work terms.
vi. Caranteed.

Program accreditation
Our Mechanical, Mining and Chemical Engineering programs are accredited by the CEAB. For more information, visit engineerscanada.ca/e/pr accreditation.cfm

## MINING ENGINEERING, B.Eng

Accredited by the Canadian Engineering Accreditation
Board (CEAB)
Extraction, discovery, and exploration thousands of feet below the earth. Strike it rich with an education at the epicentre of the global mining industry. Become part of a network of mining professionals with a long history at the Bharti School of Engineering. Learn about rock mechanics, mine surveying, ground control, mine design, mine ventilation, mine machinery, methods and mineral economics. Study and, via our highly successful co-op program, work with professionals in one of the most productive and fertile geological regions in the world and one of the world's most attractive mining camps. Learn to consider the environmental, social, and economic impacts tha influence decisions in mining and the community. Compete on regional, provincial, and national levels in the Canadian (international) and the Canadian Mining Games Our winning track record speaks for itself....become part of 'the team to beat'

## Key features

- Benefit from the co-op program by gaining work-based earning, experience and exposure while earning money for

Enhance your resume nd earn knowledge and skills that are valuable to future employers.
Apply your creative problem-solving skills, scientific and
technical knowledge to relevant issues in today's world.

## Sample career outcome

- Mining engineer/mine manage

Mining technology development and manufactur
Tunnelling and undestment
d underground construction
Language: English

## Degree options

## ORENSIC SCIENCE, B.Sc

Accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of orensic Sciences (AAFS)
The first in Canada to offer FEPAC-accredited degrees, the Laurentian Forensic Science program's guiding principle is that it is best to 'learn by doing'. Emphasis is on 'hands-on experience in the theory and practice of forensic science. A degree in forensic science may be best thought of as a degree on aspects of chemical or biological science and are introduced oo the application of these principles to forensic casework. Finally, students take part in research intensive courses, where they present their work to their peers, thus establishing some experience with public speaking and presentation. Students enefit from a state-of-the art forensic teaching laboratory and crime scene apartment.

## Key features

One of only two FEPAC-accredited programs in Canada.
Dedicated laboratories using modern technological processes.
for undergraduate
research.

- Connection with partner organizations in Ontario and across Canada
ample career outcomes
forensic scientist forensic anthropologist, forensic DNA scientist, forensic toxicologist, forensic chemist, forensic odontologist)
Forensic identification officer
Law or Law enforcement
Medicine
anguage: English

## Degree options

Bachelor of Science in Forensic Science

- Specialization in Forensic Science (FEPAC Accredited)

Combined Specialization in Forensic Science and Chemistry (FEPAC Accredited)
zation in Forensic Science and Biology
(FEPAC Accredited)

- Minor in Forensic Science

## NTERDISCIPLINARY SCIENCE, B.SC.

SCIENCES PLURIDISCIPLINAIRES, B.Sc.)
his program is geared to students who wish to obtain a science degree but who do not necessarily intend to become working scientists. The word 'Interdisciplinary' in the program name broad-based maturity in their progression. The program features several choices among the sciences, language and cultural developments, and aspects of science communication. This is the most flexible science degree program at Laurentian and students tailor it to suit their particular career goals. The 3 -year program vailable by distance education

## Key feature

The program is ideal for students with professional goals that require an undergraduate degree with specific science courses,
environmental sciance in one area (biology, chemistry, environmental science, earth sciences, computer science, or sure your education is balan

- Also offered online ( 3 -year program only).

## Sample career

Education

- Public relations
- Medical school

Language: English/French
Degree options
in Interdisciplinary Science (4-year) (English program only

PHARMACEUTICAL CHEMISTRY, B.Sc
4-year program accredited by the Canadian Society for
Chemistry (CSC)
Be involved in scientific research that makes a real difference in advancing our understanding of life and how to improve it. Learn the science behind drug and vaccine design and development. Enjoy the many benefits of small class sizes, such as greater interaction with professors, more lab time, personal tutorial sessions, and a great group dynamic. Gain hands-on experienter
by working on research projects with your professors and scientists at the University, the Health Sciences North Research Institute, and the Northern Ontario School of Medicine

## Key feature

Pharmacy.
The 4-year program is accredited by the Canadian Society for Chemistry (CSC).

- Hands-on approach to instrumentation is a great preparation for the job market.
Smail classes provide unique opportunities (e.g. paid teaching sesearch-grade equipment) instruction during labs, use of
- Participate in the co-op program to gain paid work experience in your field during your studies,

## Sample career outcomes

- School of Pharmacy
- Pharmaceutical industry
- Drug design and development
- Patent agent

## Language: English

Degree options

- Bachelor of Science in Pharmaceutical Chemistry (4-year)
- Specialization in Pharmaceutical Chemistry/Accredited by CSC

## ZOOLOGY, B.Sc

Explore the fundamentals of animal biology. This specialization focuses on animal diversity and physiology, along with the changes that occur in animal settings. Come and study animals and their tactics to surviviv in current environmental contexts. Whether you're interested in a specific class of the animal about evolutionary principles or wild life management this program will meet your needs. What's more, there is no better place than Sudbury to study environmental degradation and rehabilitation, where the ccit's' regreening intititives have been ecognized by UNESCO.
Key features

- One of only two Zoology programs offered in Ontario.

Gain over 700 hours of practical, hands-on laboratory
experience in the field in one of the most famously
environmentally rehabilitated cities in North America.
Use the program's flexibility to pursue your areas of intes evolution, wild life management, etc.
Sample career outcomes
Provincial and federal wildlife agencies

- Science communication
- Animal research
-Wildlife rehabilitation
Language: English (some courses also offered in French)
Degree option
Bachelor of Science in Zoology (4-year)
- Specialization in Zoology

LaurentianUniversity UniversitéLaurentienne
